cpX.test - The New Testing Generation

Growing requirements lead to more frequent changes to the software. At the same time, the complexity of system architectures and processes is increasing while very high demands are placed on quality. Do you lack the expertise, time and personnel to test these requirements to a sufficient extent and with the desired quality?

Automate your test processes with cpX.Test, the Customer Testing Platform of GAS-X and ENER-GX. The connection to our cloud platform enables you to execute complex, fully automated and cyclically repeatable tests on your system with your data. Trust in the know-how of our certified testers.

Testing today

Testing tomorrow. With cpX.Test.

_ Efficiency - Automation of time-consuming and repetitive test cases

_ Reusability - Investments in test automation are sustainable and increase process quality thanks to extended test coverage

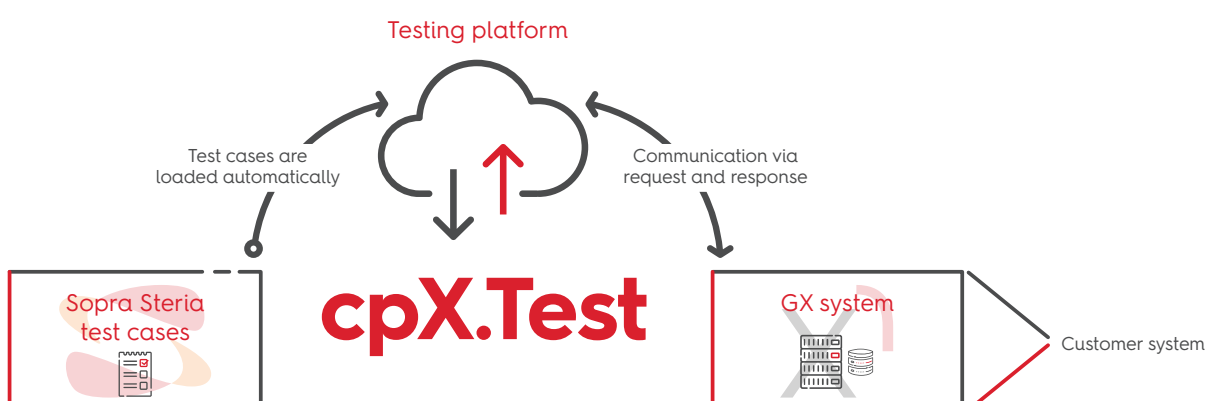

_ Saving potential - Costs for performed tests can be reduced to a necessary level

_ Transparency - Centralized management of all test cases and test case results increases overview and effectiveness

_ Proximity to process - Remote-controlled tests on the target infrastructure with „real“ data increase the quality of the software in combination with other processes

_ Time to market - Automated testing with cpX.Test shortens the time required for process adjustments in software and system integration

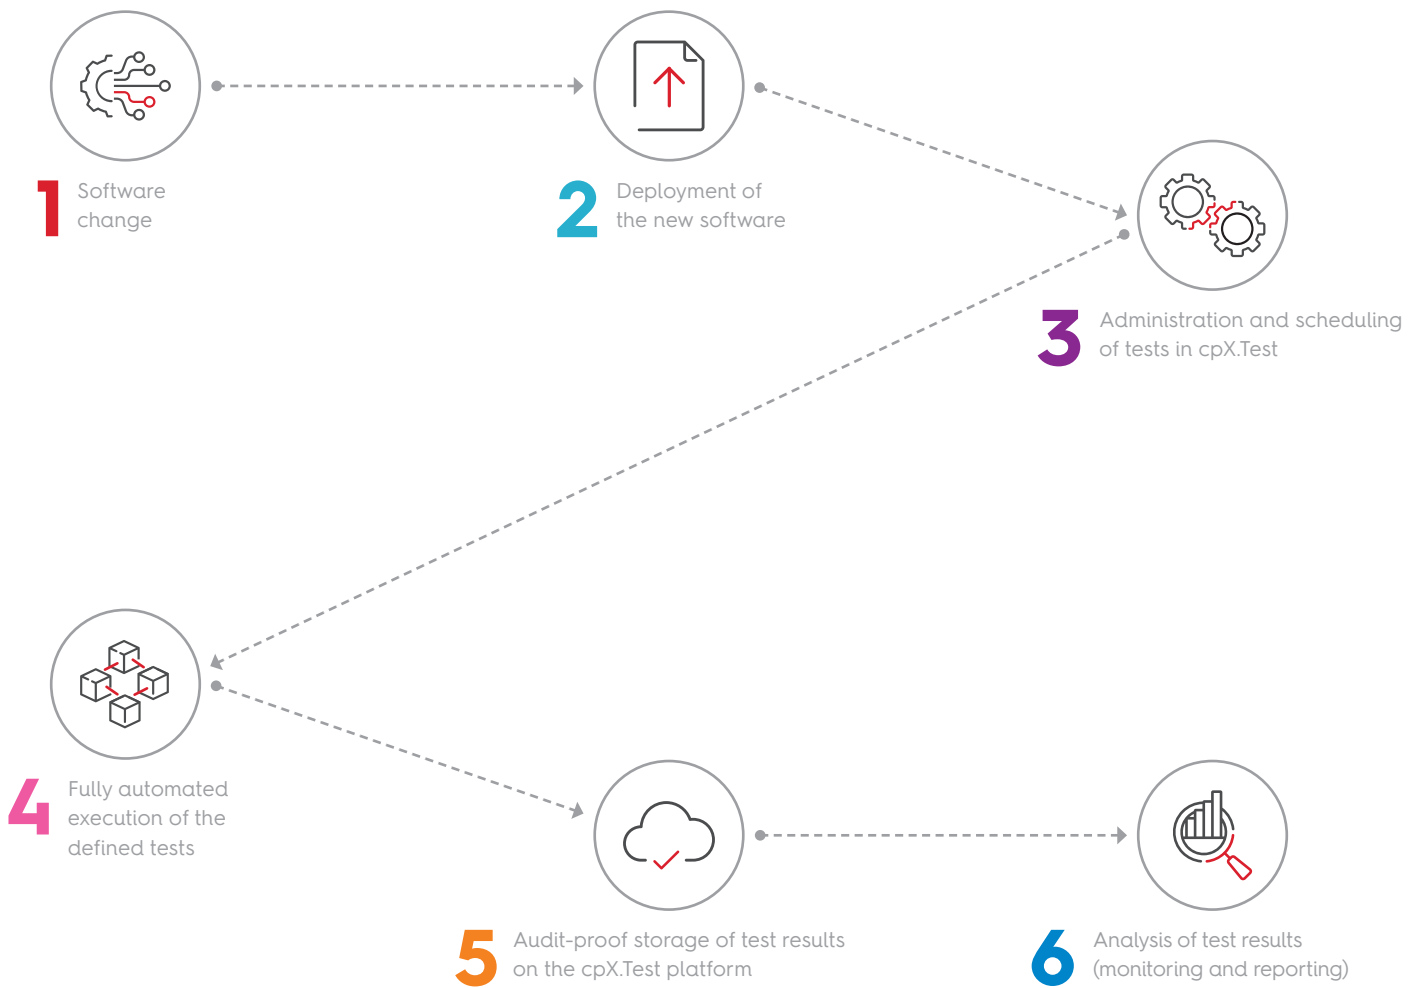

cpX.test - Our solution

Service model overview

Feature	Bronze	Silver	Gold
Simple and centralised administration of any number of test cases	✓	✓	✓
Included users	1	5	10
5 tests included (incl. error analysis and adjustment)	✓	✓	✓
Test cases can be executed as often as required	✓	✓	✓
Analysis dashboard for tests	✓	✓	✓
Detailed view of the test results in the cpX.Test platform	✓	✓	✓
Creation of individual PDF reports per test	✓	✓	✓
Time-controlled execution of tests	✗	✓	✓
Evaluation of failed test by Sopra Steria	✗	✓	✓
Creation of tickets in the event of a software error	✗	✓	✓
Adjustment of test cases by Sopra Steria	✗	✗	✓
Automatic start of tests after deployment	✗	✗	✓

The test process in cpX.Test

Wins

Quality

- Significant improvement of internal test cases
- Better process understanding
- Coverage of the end-to-end processes at the customer

Automation

- Fully automated tests
- Dynamic period configuration
- Reusable test templates
- Scheduling of the automatic tests

Documentation

- Automatic logging of the tests
- Audit-proof storage of test results
- Documentation and administration of the execution at a central location
- Numerous expansion possibilities

Tests close to customers

- Test system of the customer
- Test of the customer's infrastructure
- Test of the customer's network
- Data constellation of the customer can be tested
- Process landscape of the customer can be tested
- Interfaces of the customer can be tested

About Sopra Steria

Sopra Steria, a European leader in consulting, digital services and software development, helps its clients drive their digital transformation to obtain tangible and sustainable benefits. 46,000 experts in 25 countries provide end-to-end solutions to make large companies and organisations more competitive by combining in-depth knowledge of a wide range of business sectors and innovative technologies with a fully collaborative approach. Sopra Steria places people at the heart of everything it does and is committed to making the most of digital technology to build a positive future for its clients.
